The author gives a survey on electromagnetic pumps,
which are little known in Germany and may be of some
interest there for nuclear power purposes. Several
types are described and the difference of conduction
and induction pumps shown by means of simple consid-
erations. The range of power of these pumps is re-
ported and a short view of problems of materials given.

v. 6, Mar., p. 100-103.

DESCRIPTORS: Electric power production, *Nuclear
power plants, *Power reactors, Gas turbines, Nitro-
gen, Cooling, Temperature.

A portable power station of 2 MW on a nuclear basis
with a closed gas turbine is being completed. A high-
temperature reactor operated with nitrogen as the
working gas already ran for 48 hours with a thermal
capacity of 1150 kW. Details of the reactor and the
gas turbine are given. In the USA a reactor experi-
ment (BORF) is also being carried out as part of a log.
